

Service Advice

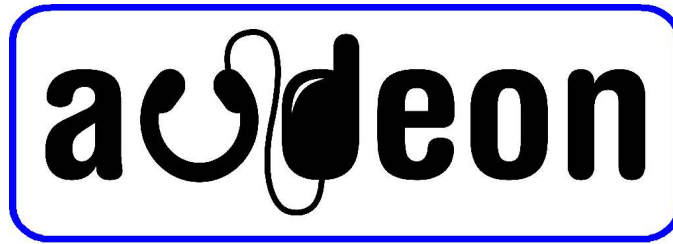

Cardio Entertainment

To keep your Audeon Fitness Entertainment System working in tip top condition you should follow a few simple procedures.

- After use** Wipe down the receiver and the exercise equipment with a dry cloth.
- Daily** Wipe the receiver and charger with a damp cloth to remove any sweat and then dry it with another clean cloth.
- Weekly** Check the receiver for correct functions.
- Monthly** Remove the receiver from the charger. Clean the rear of the receiver and the front of the charger, including the charging contacts with a damp cloth then dry off. Check for damage or corrosion and replace the receiver onto the charger if it is OK. Listen to the receiver and check the headphone lead for crackles or no sound and if faulty replace it with a new lead. If you find other problems with the receiver please arrange for it to be serviced.
- Two Yearly** Check all the receivers to ensure that they are working correctly. If the receiver fails after a short period of time after switch on then the battery may be approaching the end of its life. The manufacturers service includes replacing the NiMH battery after 2 years use for the RX5 or 10,000 hours use for the RX6. The RX6 will display a “û” when switched on to indicate that it has run for over 10,000 hours.
- Spare Parts** For genuine Audeon spares parts contact our service line or an authorised service agent.

What we do when we service a receiver

In addition to the repair of any known fault of which you advise us, we will:

1. Charge the battery for 24 hours
2. Replace the battery where required
3. Change the headphone lead
4. Change the screws if they are corroded
5. Check and re-tune the radio frequency circuits if required
6. Change the case and belt clip if required.
7. Replace the front panel display and waterproof membrane if required
8. Replace the volume control knob (RX5VK) if required
9. Listen to the receiver and check for correct functions
10. All the work will have a limited 3 month back to base warranty

All receivers which are returned to the manufacturer (direct or via our authorised service agents) are logged and date coded for future reference. We regret that we are unable to provide a warranty for work done by unauthorised persons or for the use of non genuine Audeon spare parts. Any modification to the equipment will invalidate the warranty.
